

ROTOCABE SOFFIANTE BLOWER

400 FANS EQUIPPED WITH APHONIC CABIN EUROPEAN PATENT TO 2009A001018

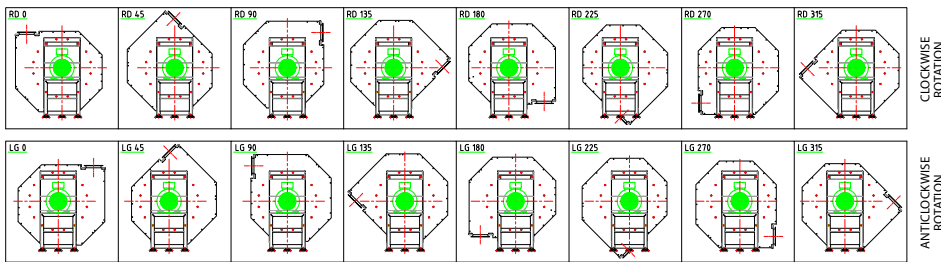

WE CREATE AIR, PERFORMANCE, SILENCE

SPECIAL SOUNDPROOFING MATERIAL "RIMOR SILENT"

"Rimor silent" is a composite made of flame-retardant carbon; inert plastic materials and textile fibres connected with further flame-retardant components (certified, according to European standards, class Ed2). Rimor has studied a suitable version, with optimized thickness and firmness, for application on industrial machines. The soundproofing material "Rimor silent", coming from aeronautical and automotive industries, is applied on the metallic parts of the Rotocabe, it is rot-proof and no-friable, making the product suitable for outdoors.

PATENTED ADJUSTABLE SYSTEM

The Rotocabe can be oriented in 8 different angles

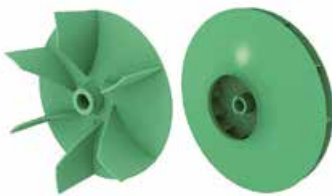

MINIMIZED DIMENSIONS AND EASY ACCESSIBILITY

PATENTED VENTILATION SYSTEM FOR THE MOTOR

The soundproof cabin optimized the spaces and can be removed easily. It preserves the motor cooling that is separated from the volute.

TECHNICAL PARTNER: EUROVENTILATORI, MARELLI MOTORI, COAER A.N.I.M.A.

Certified performances, collaboration and long experience make the Rimor's product highly reliable

CHEAP AND FLEXIBLE

TRADITIONAL SOUNDPROOF CABIN BY RIMOR

The European patent of Rotocabe represents a modular production and a successful evolution of the traditional soundproof cabins.

BLOWER ROTOCABE LOW PRESSURE

For intake of clean or slightly dusty air, they are widely used in ventilation, cooling, drying systems, in mechanical draught and disposal of harmful gases

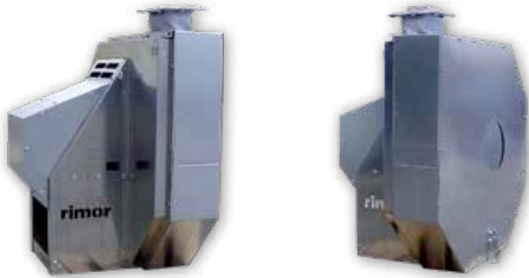

BLOWER ROTOCABE LOW PRESSURE WITH EU3 FILTER

SERIE	PORTATA	PRESSIONE	DB(A)	KW
FLP - F3	2000-30000 m3/h	50-300 mmH2O	75-80 dB(A)	2-18,5 KW

For intake of clean or slightly dusty air, with EU3 filter which provides about the 85% of filtration efficiency for particles up to 2.5µ

BLOWER ROTOCABE FOR HIGH PRESSURE

SERIE	PORTATA	PRESSIONE	DB(A)	KW
FHP	100 -30000 m3/h	50 - 1500 mmH2O	75-80-85 dB(A)	2-37 KW

For intake of clean or dusty air, they are used in concrete factories, foundries, mills, burners, chemical and metallurgical industries.

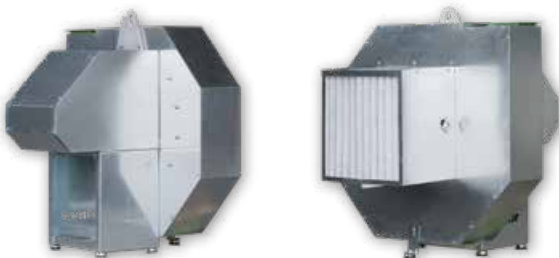

BLOWER ROTOCABE FOR HIGH PRESSURE WITH EU3 FILTER

SERIE	PORTATA	PRESSIONE	DB(A)	KW
FHP - F3	100-10000 m3/h	50-1500 mmH2O	75-80-85 dB(A)	2-37 KW

For intake of clean or dusty air, with EU3 filter which provides about the 85% of filtration efficiency for particles up to 2.5µ

BLOWER ROTOCABE FOR HIGH PRESSURE WITH EU3+F7:F9 FILTERS

SERIE	PORTATA	PRESSIONE	DB(A)	KW
FHP - F5	100-5000 m3/h	50-1500 mmH2O	75-80-85 dB(A)	2-37 KW

The combination of pre-filter EU3 with F7/F8/F9 filter, provides about the 97% of filtration efficiency for particles up to 2.5

BLOWER ROTOCABE WITH INVERTER ABOARD

SERIE	PORTATA	PRESSIONE	DB(A)	KW
FHLP - I - P55	100-30000 m3/h	50- 1500 mmH2O	75-80-85 dB(A)	2-37 KW

This machine considerably reduces the possible interferences of the inverter on the sensitive instruments.
